

Update on performance - for clients of Financial Advisers

1st QUARTER 2024 ARC GBP EQUITY RISK PRIVATE CLIENT INDEX (PCI) For clients of Financial Advisers only

We are often asked how our portfolios have performed historically but comparing the performance of investment managers has always presented a challenge to the industry given the private nature of the data and differing approaches to risk classification. Asset risk consultants (ARC) have an elegant solution in the form of their investment manager Indices which are based on actual, net of fees, performance submissions from over 70 investment management firms including Investec Wealth & Investment (IW&I). To enable like for like comparisons to be made, ARC categorise portfolios by their realised risk (annualised 3 year realised volatility rather than by their asset allocation or stated investment objective or risk tolerance). ARC have designated four risk categories and the track record presented below covers qualifying discretionary portfolios that fall into the Equity Risk category, which groups portfolios with a realised risk level of greater than 80% of the risk of equity markets generally. This track record is a good representation of the average investment returns we have achieved in this category, although the bespoke nature of our approach means that individual results will of course differ.

Please note: this document contains performance data for clients of Financial Advisers only.

Discrete annual total return performance to 31st March 2024

Calendar year	IW&I Equity Risk PCI % (IFA clients only)	ARC Equity Risk PCI %
2019	18.0%	18.0%
2020	6.1%	5.8%
2021	12.2%	12.3%
2022	-11.6%	-11.4%
2023	6.8%	8.3%
2024	4.0%	4.9%

Annualised total return performance to 31st March 2024

Period	IW&I Equity Risk PCI % (IFA clients only)	ARC Equity Risk PCI %
1 Year	9.4%	11.0%
3 Years	2.5%	3.5%
5 Years	5.1%	5.5%
10 Years	5.9%	5.9%
Since Oct 2008	7.6%	6.8%

Source for all charts and tables: asset risk consultants and Investec Wealth & Investment (31st March 2024). Performance data for clients of Financial Advisers is stated from October 2008.

Investors should remember that the value of investments, and the income from them, can go down as well as up and that past performance is no guarantee of future returns. You may not get back the capital that you invest.

Cumulative total return performance

Period	IW&I Equity Risk PCI % (IFA clients only)	ARC Equity Risk PCI %
1 Year	9.4%	11.0%
3 Years	7.8%	11.0%
5 Years	28.0%	30.7%
10 Years	77.9%	77.2%
Since Oct 2008	209.9%	177.3%

The chart below left indicates the extent of drawdowns and recovery periods on a rolling five year basis. The table on the right indicates the historic volatility.

Annualised volatilities	3 Years %	5 Years %
IW&I Equity Risk PCI (IFA clients only)	9.7%	11.7%
ARC Equity Risk PCI Average	9.5%	11.3%
Volatility Compared to PCI	0.2%	0.3%
ARC PCI Median Volatility	9.7%	11.5%

Investors should remember that the value of investments, and the income from them, can go down as well as up and that past performance is no guarantee of future returns. You may not get back the capital that you invest.

Important Information

The data used to calculate the performance figures consists of all of our discretionary managed clients with a portfolio value greater than £200,000 and where all stocks are managed within the portfolio by IW&I. Both the ARC PCI and the IW&I PCI are calculated on a simple average basis. Classification of portfolios is carried out by ARC using historic risk relative to the risk of global equities. ARC's risk categories may not match the risk and return objectives of all underlying portfolios. All data is net of fees. Average performance data will not necessarily reflect the returns achieved by individual portfolios.

Changes in rates of exchange may have an adverse effect on the value of or the return from investments denominated in other currencies.

The drawdown comparison between the IW&I PCI and the ARC PCI averages, together with the Annualised Volatility figures are intended to provide indicative illustrations of the comparative historic performance and should not be treated as a guarantee for the future.
